

Functional Knee Bracing

Breg Fusion

With its revolutionary design, FUSION provides optimal ACL, PCL and collateral ligament protection. Its sleek, lightweight, premium aluminum frame is extremely low-profile, and features BREG's proven proprietary ProForm technology, enabling a precise, contoured fit that keeps the brace solidly in place to defend the knee in virtually every situation. That means no migration and no compromises in protection. Its balanced design addresses anterior drawer, hyperextension, and varus/valgus loads, giving every wearer the freedom to perform.

Product Features and Benefits

ProForm technology provides a contoured fit and superior protection. Lightweight. Contoured frame padding that conforms to the leg. Easily adjustable/removable straps ensure a proper fit. PivotPoint Strap Tabs allow for superior comfort during motion.

Indications: ACL, PCL, Collateral ligament protection

Functional Knee Bracing

Breg X2K Unlimited

X2K Unlimited is proven to optimize resistance against abnormal varus/valgus motion, providing excellent support for the ACL, PCL and collateral ligaments. It features a lateralized, shorter tibia frame, with a open medial thigh cuff, to accommodate boots. This brace style is optimal for skiers, motocross and horseback riders, as well as patients with challenging leg shapes. X2K Unlimited is available in custom and off-the-shelf versions, powdercoat and matte plastisol coatings, as well as with standard or adjustable hinges.

Product Features and Benefits

Diamond Design for optimal varus and valgus stiffness. Lightweight. Patented adjustable hinges. Internally-mounted straps for optimal brace suspension.

Indications: ACL, PCL, Collateral ligament protection

Breg X2K Unlimited CounterForce Plus

The X2K Unlimited CounterForce Plus is recommended for patients requiring relief from a medial thigh cuff due to soft tissue demands. It is proven to provide exceptional control of varus/valgus forces associated with unicompartmental osteoarthritis of the knee. Each custom brace is designed with opposing varus or valgus force, incorporating up to 12 mm of travel to further alleviate the symptoms of OA. X2K Unlimited CounterForce Plus is also shown to reduce shear forces following meniscal repairs, chondral defect procedures and complements cartilage injections.

Product Features and Benefits

Enhanced adjustable hinge – 12 mm of travel (twice the loading capabilities as the standard adjustable hinge). Retractable opposing hinge feature. Gel comfort condyle pads. Siliconized strap padding. Over-sized tibial frame pad. Lateralized frame.

Indications: Unicompartmental OA (mild to severe). Chondral defect procedures. Meniscus procedures

Part #	Description
20043	X2K Unlimited Counterforce Plus Custom, Powdercoat
20048	X2Km Unlimited Counterforce Plus Custom, Matte Plastisol

Breg Compact X2K CounterForce Plus

This brace is designed for patients 5'6" and under. The Compact X2K CounterForce Plus is proven to provide exceptional control of varus/valgus forces associated with unicompartmental osteoarthritis of the knee. Each custom brace frame incorporates a varus or valgus load, along with an adjustable hinge that allows the condyle pad to deliver an additional 12 mm of travel to further alleviate the symptoms of OA.

Product Features and Benefits

Enhanced adjustable hinge – 12 mm of travel (twice the loading capabilities as the standard adjustable hinge). Retractable opposing hinge feature. Gel comfort condyle pads. Siliconized strap padding. Over-sized tibial frame.

Part #	Description
20021	Compact X2K Counterforce Plus Custom, Powdercoat
20024	Compact X2Km Counterforce Plus Custom, Matte Plastisol

Breg X2K PTO

The X2K PTO with adjustable hinge is a dual-function, custom-fabricated product that addresses both ligamentous instability and patellofemoral pain with or without instability or maltracking of the patella. By incorporating the inherent strength of the distinctive diamond design, X2K-PTO is proven to optimize resistance against abnormal varus/valgus motion, providing excellent support for the ACL, PCL and collateral ligaments. X2K-PTO is available in custom only.

Product Features and Benefits

Diamond Design for optimal varus and valgus stiffness. Internally-mounted straps for optimal brace suspension. Lightweight. Patented adjustable hinges (lateral side only).

Indications ACL, PCL, Collateral ligament, Patellar tracking instabilities

Functional Knee Bracing

Bledsoe AXIOM "D" Off-the-Shelf Functional Knee Brace

The **NEW Dynamic, Muscle-Powered AXIOM-D OTS** places increasing posterior force against the tibia as the knee moves into extension. This unique force prevents subluxation and supports natural quadricep and hamstring activity. It reduces the symptoms of ACL deficiency... Security is restored.

Product Features and Benefits

Improved Protection...Off-the-Shelf: Tough new alloy composite shell will not deform from impact. Will not crack like carbon fiber. Weighs less too. Anti-migration design uses pivoting posterior calf strap plus a gastroc gripper pad to "lock" onto calf muscles. No-catch hinge design prevents the hinge from snagging objects or digging into the ground during aggressive sports play. The unique Ratchet Release closure (pat. pend.) extends strap life. Hinges can be disassembled for easy cleaning and maintenance. All parts can be replaced by the patient using the tools provided. New soft, velour-like padding for comfortable continuous wear. Available with optional Hi-Activity shell pads for sport play.

Functional Knee Brace

Bledsoe 20-50 Patellofemoral Brace

The **Bledsoe 20.50** is the first patellofemoral brace to function in flexion, which is where the pain happens. **The Bledsoe 20.50 is also available in a custom version.**

Product Features and Benefits

Functions dynamically - begins to tighten immediately in flexion, with the strongest force between 30 and 40 degrees. The 20.50 relaxes tension past 90 degrees through extension. Convenient short length, 12 inches (30.5 cm). Innovative pneumatic Patello-Force strap allows natural patella movement, including tilt and rotation. Correct high Q-Angle lateral pull. New Magnesium alloy -- 30% lighter than aluminum Magnesium frame adds MCL and LCL support. Adjustable Crescent Finger Pad grips the patella to control Medial Tilt, Patellar Baja and other forces. Circumferential straps provide firm correction, keeping the patella in the groove. Cooler than neoprene. Rigid shell performance counters the force of the quads and resists rotation. Improves patellofemoral tracking. Controls patellar subluxation and dislocation.

Bledsoe Crossover

The **Bledsoe Crossover** knee brace is designed for very mild meniscal and/or collateral injuries. Patients with minor knee ligament strains and stretches or meniscal damage can benefit from added support to prevent more serious injury. Bledsoe offers several versions of the Crossover to provide the right kind of support for these very mild instabilities. Cool, breathable Spacer Mesh provides support, compression and warmth to the knee. Easily adjustable hinges for ideal anatomical placement. Available in Short and Standard lengths. Also available in Neoprene.

Measurements: measure the thigh circumference 6" (15 cm) above the knee.

Functional Knee Bracing

DonJoy Defiance III Custom

The Custom Defiance and Defiance III is DonJoy's hallmark knee brace. Combining the ultimate in technology, materials and design, this lightweight brace provides durable support for moderate to severe ACL, PCL, MCL and LCL instabilities. Plus, the low-profile design fits comfortably underneath clothing and sports uniforms, including hockey and football. As the strongest of DonJoy's functional braces, the custom, carbon composite Defiance is recommended for high collision sports, while its featherweight materials and custom fit also make it the brace of choice for activities of daily living. Available in three lengths: standard, short and standard thigh with short calf.

Product Features and Benefits

ACL/PCL versions with patented 4-point dynamic leverage system. Medial sweeping thigh that provides inner thigh clearance for bi-lateral brace use and riding sports. Anti-Migration Strap to prevent brace from migrating. Swiveling strap tabs for changing leg shapes through flexion and extension. Low profile hinge cover for better strength and medial clearance.

Please see Size and Accessory Information at the Bottom of this Page.

DonJoy Defiance Custom

The Custom Defiance is DonJoy's hallmark knee brace. Combining the ultimate in technology, materials and design, this lightweight brace provides durable support for moderate to severe ACL, PCL, MCL and LCL instabilities. Plus, the low-profile design fits comfortably underneath clothing and sports uniforms, including hockey and football. As the strongest of DonJoy's functional braces, the custom, carbon composite Defiance is recommended for high collision sports, while its featherweight materials and custom fit also make it the brace of choice for activities of daily living. Available in three lengths standard, short and standard thigh with short calf.

Product Features and Benefits

ACL/PCL versions with patented 4-point dynamic leverage system. Supra Condyle Suspension—• Short calf version available for ski and motocross boot clearance. • Short and standard lengths. Defiance Extra version includes reinforced carbon frame and slide shield. Suede, chamois and chamois pneumatic liners and strap pads available. Flexion stops: 45°, 60°, 75° and 90. Extension stops: 0°, 10°, 20°, 30° and 40° (10° installed)

Please see Size and Accessory Information at the Bottom of this Page.

DonJoy Female Fource Custom

The Custom Defiance III and Defiance Female Fource is DonJoy's premier knee brace for females. Combining the ultimate in technology, materials and design, this lightweight brace provides optimal support for moderate to severe female ACL instabilities, ACL reconstructions, collateral ligament instabilities, hyperextension and for prophylactic use. The low-profile design allows for a comfortable fit under clothing. As the strongest of DonJoy's functional braces, the custom, carbon composite Defiance III and Defiance Female Fource is recommended for high collision sports, its featherweight materials and custom fit also make it the brace of choice for activities of daily living.

Product Features and Benefits

Patented FourcePoint Hinge Technology: The only bracing technology clinically proven to protect the ACL. Reduces the time spent near full extension, or in the "at risk" position. Enhances the Four-Points-of-Leverage design by increasing the posterior load applied by the brace on the tibia. Improves a patient's natural gait by applying progressive resistance before reaching a firm end point. Four-Points-of-Leverage design for superior ligament protection and comfort. Medial Swooping Thigh Frame (Defiance III) for increased medial thigh clearance. Swiveling strap tabs (Defiance III) to match anatomy through movement. Anti-Migration calf strap and Supra condylar Pad for brace suspension. Lightweight (18oz), low profile design. Short calf versions available. Short thigh available (Defiance). Lifetime limited warranty on frame and hinge.

Please see Size and Accessory Information at the Bottom of this Page.

Functional Knee Bracing

DonJoy Armor

Armor is the strongest, off-the-shelf functional knee brace on the market and is designed for active people seeking ligament protection, excellent fit, and superb comfort.

Product Features and Benefits

ForcePoint Hinge Technology provides an adjustable, gradual soft stop to extension. Standard polycentric hinge available on all versions. Flexion and extension control. Medial hinge deflector (Ski version only) for bilateral brace use. Moldable frame for custom fit. Medial swooping thigh cuff for inner thigh clearance and bilateral brace use. Strong and lightweight 6061-T6 aircraft aluminum frame for medial / lateral control. Durable, silver-veined powder coat finish. Standard calf length for maximum leverage and short calf length for boot clearance. Swiveling strap tabs to accommodate changing leg and muscle positions. Anti-migration Supra Condyle Pad (Action version only). Air Condyle Pad (Ski version only) promotes brace suspension. Impact Guard accessory protects the shin and knee against blunt blows. Calf Pinch Guard accessory provides a smooth transition between boot and calf cuff. 1 year warranty on frame and hinge. 6 month warranty on soft goods.

DonJoy FullForce

The FULLFORCE design combines two clinically-proven DonJoy technologies in one brilliantly performing brace. Our 4-Points-of-Leverage System provides ligament stability and significantly reduces ACL strain. DonJoy's ForcePoint hinge dampens knee joint extension, which increases flexion angles and reduces anterior shear forces on the tibia. The result - less strain on the ACL and a considerable decrease in the chance of injury. Together, these two technologies add up to ironclad confidence.

Product Features and Benefits

Clinically proven 4 Points of Leverage™ system pioneered by DonJoy. Clinically proven LoPro ForcePoint™ hinges, the only bracing technology clinically proven to protect the ACL. Swooping Thigh cuff for inner thigh clearance and bilateral brace use. Strong aircraft grade aluminum frame (0.08 - 0.125" thick). Anti-Migration band anchors on the upper calf. Swiveling Internally mounted Strap Tabs to accommodate. Carbon coat finish. 1 year warranty on frame and hinges. 6 months warranty on softgoods

Functional Knee Bracing

DonJoy Female Fource OTS

DonJoy's OTS Female Fource is a lightweight, low profile functional knee brace designed specifically for females and is perfect for the active female returning to sport or the general female population returning to activities of daily living where an OTS brace is required.

Product Features and Benefits

Patented FourcePoint Hinge Technology: The only bracing technology clinically proven to protect the ACL. Reduces the time spent near full extension, or in the "at risk" position. . .ances the Four-Points-of-Leverage design by increasing the posterior load applied by the brace on the tibia. Improves a patient's natural gait by applying progressive resistance before reaching a firm end point. Four-Points-of-Leverage design for superior ligament protection and comfort. Medial Swooping Thigh Frame for increased medial thigh clearance. Press fit upper thigh rivets for a low profile, sleek design. Swiveling strap tabs to match anatomy through movement. Anti-Migration calf strap and Supra condylar Pad for brace suspension. Custom Graphics Sticker Kit to personalize the brace to your own liking. Lightweight (18oz). Moldable frame for a custom fit. One-year warranty on frame and hinge.

Functional Knee Bracing

DonJoy ACL Everyday

The ACL Everyday represents DonJoy's most comfortable, easiest to use, lightest, patient-ready knee brace and is ideally suited for non-contact sports and activities of daily living. For mild ACL/MCL/LCL instabilities and comfortable support for the activities of daily living, or non-contact sports.

Product Features and Benefits

Total Comfort Guarantee. 4 Points of Leverage system pioneered by DonJoy. Lightweight (15 oz.). Sleek, low profile (.080" thick), aesthetically pleasing, aircraft grade aluminum frame. Ergonomic, swooping thigh and calf cuffs provide clearance for the contralateral leg. Contoured, flexible cuff shells conform to patient anatomy. Hypoallergenic Sili-Grip strap pads promote brace suspension. 10° soft stops to reduce impact noise. Short brace length (13) accommodates short inseams. 1 year warranty on frame and hinges. 6 month warranty on soft goods

DonJoy Playmaker/Wraparound IROM Playmaker

The wraparound design makes this brace ideal for those patients who have trouble applying a sleeve-style brace. It provides dependable support for mild to moderate ACL and/or PCL, MCL and LCL instabilities. The IROM Playmaker is ideal for post-op care following meniscal repairs as well as ACL/PCL reconstruction.

Product Features and Benefits

ACL and PCL versions feature patented 4-point dynamic design. Wraparound style neoprene sleeve. Available with polycentric or IROM hinge. Polycentric hinge provides extension stops of 10°, 20°, 30° and 40° (10° installed) and flexion stops of 45°, 60°, 75° and 90°. Additional full-circumference thigh strap for CI conversion
